Coalition Launches to Support Use of Liquefied Natural Gas in New York State as a Vehicular Fuel Source

TONAWANDA, NY – Today the Buffalo Niagara Manufacturing Alliance (BNMA), Buffalo Niagara Partnership (BNP), Manufacturers Association of Central New York (MACNY), and several other supporting businesses and organizations announced the formation of a new coalition – LNG for NY – dedicated to bringing liquefied natural gas (LNG) to New York State as a vehicular fuel source.

“LNG for NY was formed to advocate for the use of a cleaner, more efficient, and readily available fuel source in New York State,” said BNMA Vice President Peter Coleman. “It’s time for New York to join 49 other states in adopting LNG energy policy that embraces, rather than stifles, emerging alternative fuel sources and technologies.”

As part of the overall LNG for NY coalition effort, a new website was created at <http://lngforny.com>, which will act as an informational hub for all things related to the removal of current LNG dispensing prohibitions in New York State. Visitors to the site can expect to find news stories, fact sheets, support letters, and updates regarding the coalition’s ongoing efforts to bring LNG use to New York. In addition, interested individuals, businesses, labor groups, and environmental organizations can join the cause or subscribe to our email list to get updates on the latest LNG developments.
